ABCs Areas

California (San Francisco County and children < 18 years, adults ≥ 65 years in Alameda and Contra Costa counties); Colorado (5 county Denver area); Connecticut; Georgia (20 county Atlanta area); Maryland (6 county Baltimore area); Minnesota; New Mexico; New York (15 county Rochester and Albany areas and children <5 years in Erie county); Oregon (3 county Portland area); Tennessee (20 counties).

ABCs Population

The surveillance areas represent 31,977,800 persons.

ABCs Case Definition

Invasive pneumococcal disease: isolation of *Streptococcus pneumoniae* from normally sterile site in resident of a surveillance area in 2015.

ABCs Methodology

ABCs personnel routinely contacted all microbiology laboratories serving acute care hospitals in their area to identify cases. Standardized case report forms that include information on demographic characteristics, clinical syndrome, and outcome of illness were completed for each identified case. Pneumococcal isolates were collected and sent to reference laboratories for susceptibility testing using CLSI methods and serotyping. Regular laboratory audits assessed completeness of active surveillance and detected additional cases.

Rates of invasive pneumococcal disease were calculated using population estimates for 2015 from the bridged-race vintage 2015 postcensal file. For national estimates, race- and age-specific rates of disease were applied from the aggregate surveillance area to the age and racial distribution of the 2015 U.S. population. Cases with missing data, excluding ethnicity, were multiply imputed using sequential regression imputation methods.[†]

Reported ABCs Profiles

Race	No.	(Rate [*])
White	2,089	(8.7)
Black	683	(12.8)
Other	171	(6.6)

[†] Surveillance Note

Missing race (n=304) data were multiply imputed using sequential regression imputation methods.

National Estimates of Invasive Disease

Cases: 29,500 (9.2/100,000)
Deaths: 3,350 (1.04/100,000)

Healthy People 2020 Update

Objective: Decrease the incidence of invasive pneumococcal infections to 12 per 100,000 persons less than 5 years of age and to 31 per 100,000 persons aged 65 and older.

Age (year)	2020 Objective	2015 Rate [*]
< 5	12/100,000	9/100,000
≥ 65	31/100,000	25/100,000

^{*}Per 100,000 U.S. population < 5 years or ≥ 65 years
